

WINDOW & DOOR REPLACEMENT

Replacement windows and doors must match the original products as closely as possible.

When filling out an ACC request form, please be as specific as possible and include photos with product literature that details the windows/door specifications.

The only approved storm door is a full view door with clear glass. We will also accept a full view door that is self-storing, i.e. with a retractable screen and one cross bar.

If your request is complete and the replacement product is identical (or nearly so), then your request can be expedited. Please ask for this when you submit your request.
